

Setting up the Application environment

Docker CLI Installation

Date	06 November 2022
Team ID	PNT2022TMID08777
Project Name	Plasma Donor Application
Maximum Marks	4 Marks

The screenshot shows the Docker Docs website for the 'Install on Windows' page. The page title is 'Install on Windows'. It includes a 'Docker Desktop terms' section with a note about commercial use. A 'Download Docker Desktop for Windows' button is prominently displayed. Below this, the 'System requirements' section states that the Windows machine must meet certain criteria. The right sidebar contains 'Page details' (7 minute read), 'Tags' (windows, install, download, docker, local, Docker Desktop), and a 'Contents' list with links to system requirements, WSL 2 backend, Hyper-V backend, and other installation methods. A 'Give feedback' button is also visible.
